## BENEFITS

LandingZone is an attractive and simple to use secure docking station for the MacBook Air. You can return from traveling with your computer and simply snap it into the LandingZone on your desk and enjoy the benefits of a complete desktop workstation.

## FEATURES

- Single-step docking
- Built-in USB Hub with 4 USB 2.0 ports
- 10/100BASE-T Ethernet port
- Mini DisplayPort capable of driving resolution up to 2560x1600
- Built-in security port compatible with all the Kensington® Laptop Locks (sold separately) to secure your MacBook Air
- U.S. Power adapter with wide range of input voltage (100~240 VAC)
- Supports high-speed charging of iPhone, iPad, and iPod on the left side
- USB pass-through port
- White on/off status LED on the right wing
- Lever Lock Travel Clip for travel

## BEFORE YOU BEGIN

**Travel Clip:** Remove the Travel Clip **(1)** on the Opening Lever **(8)**. When transporting your LandingZone Pro, you can use the Travel Clip to secure the Opening lever.

**Ethernet functionality:** Go to [landingzone.net/download](http://landingzone.net/download) to download and install the latest Ethernet driver for full Ethernet compatibility.

## USB DEVICES ARE NOT WORKING

Make sure that both sides of the LandingZone are completely closed and the connectors are fully inserted into the MacBook Air. Confirm that the power adapter is properly plugged into your wall outlet and connected to the LandingZone (the On/Off Status Indicator light should glow).

## MACBOOK AIR IS NOT CHARGING

Confirm that you properly inserted the MacBook Air's MagSafe power adapter into the LandingZone **(4)**.

## ETHERNET IS NOT WORKING

Double-check that you have the proper Ethernet driver installed.

## WINGS DON'T CLOSE PROPERLY

Make sure that you push the MacBook Air all the way back to the two guide posts. Before carefully pushing the sides together, align the connectors so that they fit into the MacBook Air's ports.

## IPHONE/IPAD/IPOD CHARGES SLOWLY

Use the USB port on the left side for high-speed charging.

# TROUBLESHOOTING

# DOCKING

**STEP 1:**

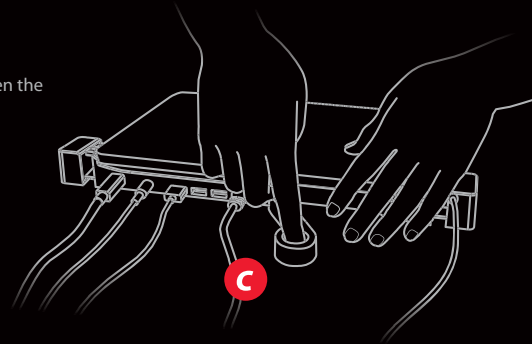

Eject devices in the OS

**STEP 2:**

Unlock if using a lock, then open the lever (C)

**STEP 3:**

Lift out your MacBook Air

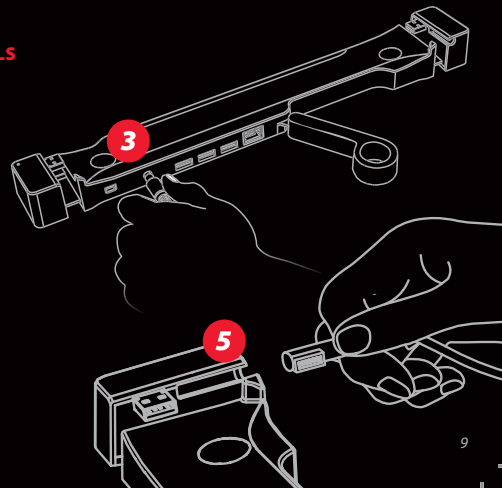

# UNDOCKING

## STEP 1: CONNECT POWER & PERIPHERALS

- Connect the power adapter (3) and insert your MacBook Air's MagSafe plug into the Magsafe Power Port (5)
- Connect Ethernet & peripherals such as monitor, keyboard, storage devices, drawing tablet, etc. (Note: you must install the Ethernet driver first to use Ethernet)

*Tip: For high-speed charging, connect your iPhone, iPad, or iPad to the USB port on the side (6)*

## STEP 2: CONNECTING YOUR MACBOOK AIR

- Place your closed MacBook Air into LandingZone until the back of your MacBook Air touches the two guide posts **(A)**
- Push both ends **(B)** of the LandingZone gently inward to fully engage with the MacBook Air. **Do not use the lever on the LandingZone when you dock the computer**

*Optional: If you have a Kensington® Lock (not included) lock the LandingZone following instructions with the lock*
